

How to use the Admin Panel

This guide explains every menu in simple words. Open the left menu, tap an option, then use the buttons inside.

Tip: Each line is one action. Go there -> do this -> that happens.

1. Dashboard

Open Dashboard

See a quick summary of your business on one screen.

Stock numbers

Shows how many items are free, on event, or damaged.

Order numbers

Shows how many events are upcoming and ongoing.

Staff and categories

Shows how many employees and categories you have.

Tap a card

Opens that related page (for example Orders or Employees).

2. Inventory

Open Inventory

See all your equipment / stock items.

Search / filter

Find an item by name, category, or date availability.

Add item (+)

Create a new stock item with name and quantity.

Edit item

Change item name, quantity, or details.

Delete item

Remove an item you no longer use.

Availability by date

Pick a date to see what stock is free for that day.

3. Categories

Open Categories

Organize stock into groups.

Add Master Category

Create a main group (example: Speakers).

Add Sub-Category

Create a smaller group under a master category.

Add Item here

Add stock under a sub-category.

Edit

Rename or update a category / sub-category / item.

Delete

Remove a category, sub-category, or item.

4. Orders

Open Orders

See all event bookings.

Filter list

Choose status or date to find orders faster.

Create Order (+)

Add a new event with client name, phone, email, date, and amount.

Open / Manage Order

Open one order to edit everything for that event.

Edit order details

Update client info, address, setup time, budget, GST.

Change Status

Move order to Upcoming, Ongoing, Completed, or Cancelled.

Assign Workforce

Choose which employees work on this event, then Save.

Assign Inventory

Reserve equipment for this event, then Reserve.

Invoice button

Open the bill for this order.

Send Invoice Email

Send the invoice link to the client email.

Print / WhatsApp

Print the bill or share it on WhatsApp.

Delete Order

Remove an order you do not need.

Status meaning: Upcoming = booked later | Ongoing = happening now | Completed = finished | Cancelled = stopped.

5. Finance

Open Finance

See money coming in and going out.

Add entry (+)

Add Income (money received) or Expense (money spent).

Filter / sort

Find entries by date or amount.

Delete entry

Remove a wrong money entry.

Totals

See total income, expense, and profit at a glance.

6. Employees

Open Employees

See all staff accounts.

Add employee (+)

Create staff login with name, email, and password.

Edit employee

Update staff name or phone.

Reset Password

Give staff a new temporary password.

Deactivate / Reactivate

Stop or allow that staff to log in.

Delete employee

Remove a staff account.

7. Teams

Open Teams

See staff groups.

Add team (+)

Create a new team.

Add member

Put an employee into the team.

Remove member

Take an employee out of the team.

Delete team

Remove the whole team.

8. Settings

Open Settings

Control company options.

Upload logo

Put your company logo in the app.

Remove logo

Take the logo off.

Scan on / off

Turn scanning on or off for employees.

GST settings

Save GST number and GST percentage, then Save GST.

Email (SMTP) settings

Set the system that sends emails from the app.

Test email

Send a test mail to check email is working.

9. Email Requests

Open Email Requests

See when staff ask to change their login email.

Approve

Allow the email change. Staff gets an OTP to finish.

Reject

Stop the email change request.

10. Scan Item

Open Scan Item

Use barcode to move stock.

Checkout

Scan item and link it to an Ongoing event.

Check-in

Scan item to return it back to stock.

Mark Damaged

Scan item to mark it as damaged.

Tip: For checkout, choose an Ongoing event first, then scan.

11. Change Email

Open Change Email

Change your own admin login email.

Enter new email + password

Confirm it is really you.

Enter OTP

Type the code sent to the new email to finish.

12. Change Password

Open Change Password

Change your login password.

Enter current password

Prove it is you.

Enter new password

Type new password twice and save.

Simple daily flow

- 1) Create Order
- 2) Assign staff + reserve inventory
- 3) Set status to Ongoing
- 4) Scan items out / in

- 5) Add money in Finance
- 6) Open Invoice and send to client
- 7) Mark order Completed

That is the whole Admin Panel - simple and ready to use.
