

Feature & How-to Guide

Simple description of every function — what it does and how to use it

WHO USES THIS

ADMIN

Owner / manager

- Full access to all business screens
- Orders, inventory, money, staff, settings

STAFF

Field / warehouse

- Only assigned work and scanning
- Cannot see money or company settings

WHAT THIS SYSTEM IS FOR

One place to manage events, equipment, staff, payments, and invoices for Parth Production (sound, light, truss, SFX).

MAIN FLOW

1. Book

Create an order with client and event details.

2. Prepare

Reserve gear and assign staff or teams.

3. Deliver

Scan gear out, run the show, mark setup done.

4. Invoice

Create and share the bill with the client.

5. Collect

Record payments and track what is still due.

6. Return

Scan gear back into stock after the event.

ACCOUNT

Login & account access

How people sign in and manage their account.

Login

What it does: Lets Admin or Staff enter the system with email and password.

How to use: Open the login page → enter email and password → tap Login. If asked, complete the security check first.

Forgot password

What it does: Helps you set a new password when you forget the old one.

How to use: Tap Forgot password → enter email → enter the code from your email → type a new password → Login again.

Verify email

What it does: Activates a new staff account after Admin creates it.

How to use: Open Verify email → enter your email and the 6-digit code from inbox → then Login. You may be asked to change the temporary password.

Change password

What it does: Updates your login password.

How to use: Open Change Password → enter current password → enter new password twice → Update. If the system forces a password change, you must do this before using other screens.

Change email

What it does: Changes the email used to log in.

Admin: Change Email → current password + new email → enter OTP from the new inbox → confirm.

Staff: Request change → Admin approves on Email Requests → complete the form from email → verify new inbox.

ADMIN

Dashboard, Inventory, Categories

Core screens for running day-to-day operations.

Dashboard

What it does: Shows quick counts — events, gear out, staff — and a shortcut to create an order.

How to use: Open Dashboard after login. Tap Create Order to start a new booking. Review the summary cards for today's picture.

Inventory

What it does: Lists all equipment with quantity, barcode, category, and status (available / on event / damaged). You can also check how much is free on a chosen date.

How to use: Open Inventory → search or filter → Add / Edit / Delete items → adjust quantity when needed → print barcodes → pick a date to see availability.

Categories

What it does: Organises gear into Master category → Sub-category → Items.

How to use: Open Categories → create or edit groups → add items under the right group → print barcodes from here if needed.

Scan Item (Admin can also use)

What it does: Moves gear to an event, returns it to stock, or marks it damaged.

How to use: Open Scan Item → choose action → if moving out, pick the ongoing event → scan with camera or type barcode.

ADMIN

Orders & Manage Order

How to book an event and run it until completion.

Orders list

What it does: Shows all bookings. You can filter by status, date, year, or search client/address.

How to use: Open Orders → use filters → tap an order to manage it, open invoice, or delete.

Create order

What it does: Saves a new event with client details, dates, address, amount, advance, and optional GST invoice.

How to use:

1. Tap Create / Add Order.
2. Fill client name, phones, email, event type, setup/event date & time, addresses.
3. Enter amount and any advance paid. Turn on GST if needed.
4. Optionally send invoice by email. Save.

Manage order

What it does: Edit details, change status, reserve gear, and assign staff/teams.

How to use:

1. Open the order.
2. **Reserve inventory:** search gear → choose quantity → reserve.
3. **Assign workforce:** pick people and/or teams (they get notified).
4. **Status:** Upcoming → Ongoing when live → Completed when finished.
5. On Complete, choose auto return of stock or return later via Scan.

ADMIN

Finance & Invoices

Track money and share bills with clients.

Finance

What it does: Shows total income, expenses, amount still due, and profit. Lists money entries linked to an order or marked as general.

How to use: Open Finance → set date range → Add income/expense → search or sort rows → call or WhatsApp client from a row when a phone number exists. Amounts can be hidden if others are watching.

Invoice (Admin view)

What it does: Creates a clean print-ready invoice with company logo and optional GST. No equipment list on the printed bill.

How to use: From Orders or Manage Order → open Invoice → Print, or share via WhatsApp with totals and a private link.

Client invoice link

What it does: Lets the client view their invoice safely online.

How to use (client): Open the link → enter their email → enter the one-time code sent to that email → view invoice.

ADMIN

Employees, Teams, Settings

Manage people and company setup.

Employees

What it does: Create and manage staff accounts.

How to use: Open Employees → Add (name, email, phone, temporary password) → staff verifies email then logs in and changes password. You can edit, deactivate/reactivate, reset password, or delete. Search and filter active/inactive.

Teams

What it does: Groups staff into named crews for faster assignment.

How to use: Open Teams → create a team → add/remove members → later assign the whole team on an order.

Email Requests

What it does: Admin inbox for staff email-change requests.

How to use: Open Email Requests → Approve or Reject each pending request.

Settings

What it does: Company branding and system options.

How to use:

- **Logo:** upload a clear image (recommended wide logo, high quality).
- **Scan visibility:** turn Scan Item on/off for all staff.
- **GST:** save GST number and percentage for invoices.
- **Email:** enter outgoing email settings and send a test email.

STAFF

Staff screens

Only the tools needed on the ground.

Dashboard

What it does: Shows how many events you are assigned to.

How to use: Open Dashboard after login. Use it as a quick start, then go to My Tasks or Scan.

My Tasks

What it does: Lists your assigned events with date, time, client, and address.

How to use: Open My Tasks → review your shows → jump to Scan when needed → tap Mark Setup Done when stage setup is finished (Admin gets a notification).

Scan Item

What it does: Checks gear out to an event, returns it, or marks damage. (Only visible if Admin enabled it.)

How to use:

1. Choose action: Move to Event / Return to Stock / Mark Damaged.
2. For Move to Event, select the ongoing event.
3. Scan barcode with camera or type it.

Notifications

What it does: Alerts for assignments, setup updates, and account messages.

How to use: Tap the bell → open an alert → mark one or all as read.

Change Email / Change Password

What it does: Updates login details (email change needs Admin approval).

How to use: Use the menu items and follow the on-screen steps / email codes.

QUICK HOW-TO

Common tasks

Short checklists for everyday work.

Add a staff member

1. Employees → Add
2. Enter name, email, phone, temporary password
3. Staff verifies email
4. Staff logs in and sets a new password

Book an event

1. Orders → Create
2. Fill client and event details
3. Reserve gear
4. Assign staff/teams
5. Set status to Ongoing when live

Share an invoice

1. Open order → Invoice
2. Print or WhatsApp the link
3. Client verifies email with a code
4. Client views the invoice

Return gear after event

1. Open Scan Item
2. Choose Return to Stock
3. Scan each item
4. Or complete order with auto-return

First-time setup (Admin)

1. Settings → upload logo
2. Set GST if you use it
3. Configure outgoing email and send a test
4. Add staff and inventory
5. Create first order and try a scan
